Is this bio art, bio design, creative biotech, ethics art,
is this science propaganda, ecological hazard?

Do we need to define a taxonomy of creative works
that involve life and living matter and organisms?

Bio (art) protocol – Making competent cells - C-lab

24 April 2012

Re: Creation of competent strains of *E. coli* (DH5 alpha) at the De Waag.

To whom it may concern,

This declaration is in support of the legality of inducing competence in the DH5-alpha strain of *E. coli* at De Waag. It refers to guidance from the National Institute for Public Health and the Environment (RIVM).

Section 0. Background

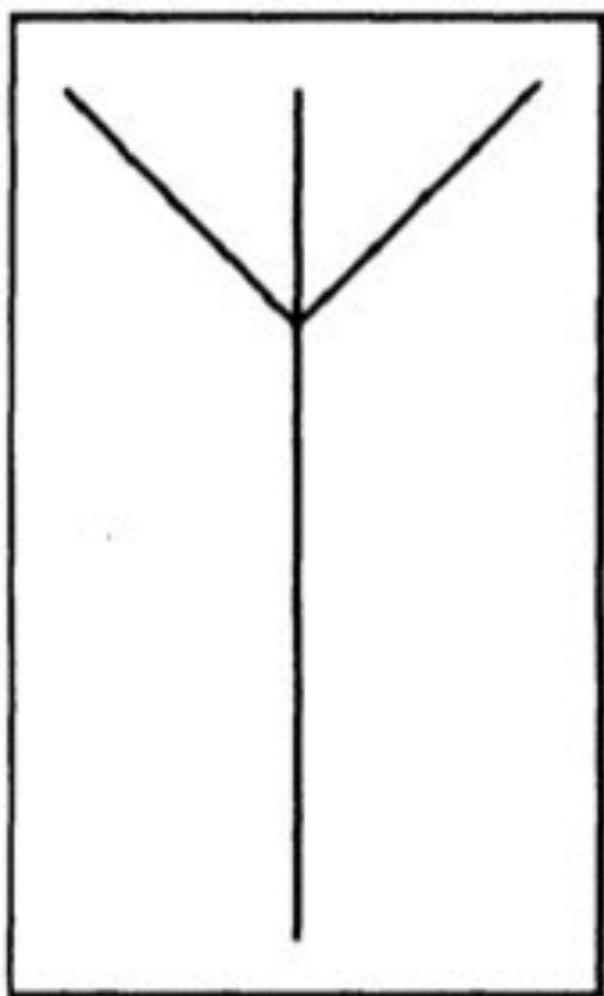

De Waag is a non-profit, community run space in central Amsterdam. The Do it together Bio workshops and Open Wetlab are do-it-yourself biologists, artists and hobbyist who regularly meet at De Waag for series of public events. The group consists of both professional and amateur biologists.

Section 1. No genetic modification.

No regulations apply to working with genetically modified organisms. We believe that the DH5-alpha will not be genetically modified at any point during the work undertaken. We will work with DH5-alpha in a safe environment and communicate
