PROFESSIONAL SUMMARY

Security Analyst specializing in vulnerability and exposure management, security automation, and endpoint security. Currently building production SOAR workflows in Tines integrating CrowdStrike, Axonius, Intune, and Jira via REST APIs to automate remediation, asset hygiene, and GLBA/IRS audit evidence collection.

PROFESSIONAL EXPERIENCE

TaxSlayer LLC — Augusta, GA Sep 2024 - Present

Security Analyst I – Exposure & Asset Intelligence May 2026 – Present

- Developing workflows to automate GLBA and IRS audit evidence collection by correlating vulnerability history, asset details, SLAs, remediation status, and Jira ticket history.
- Built custom detection logic in Tines correlating CrowdStrike and Axonius data to flag applications outside the approved software list, closing shadow-IT and software compliance gaps.
- Designed and implemented vulnerability management automation in Tines integrating CrowdStrike Spotlight, Jira, Axonius, Intune, and other asset sources through REST API workflows.
- Developed SOAR workflows in Tines utilizing CrowdStrike, Axonius, and Intune to identify unmanaged, orphaned, and stale workstations and servers for remediation prioritization based on asset criticality.

Information Security Analyst Sep 2025 – May 2026

- Led the migration from Jamf Pro to Microsoft Intune for macOS as sole technical contributor, authoring custom configuration profiles and plist-level modifications for application management, compliance enforcement, and endpoint hardening across the production rollout.
- Reviewed and implemented Conditional Access policies in Entra ID and deployed Zero Trust Network Access via Netskope and Zscaler to endpoints.
- Served as sole acting analyst for security alert triage, incident response, and remediation across CrowdStrike, Microsoft Defender, Netskope, FortiDLP, Azure, and CrowdStrike Falcon NG-SIEM.
- Managed vulnerability prioritization and remediation coordination for 5,000+ endpoints, using risk severity, asset exposure, and business context to drive SLA-based remediation.

Help Desk Engineer Sep 2024 - Sep 2025

- Administered enterprise endpoint management with Microsoft Intune, Jamf Pro, and ConnectWise Automate; responsible for security patches, compliance policies, configuration profiles, and scripts.
- Updated legacy Bash and PowerShell scripts deployed through MDM platforms.
- Automated user onboarding/offboarding for 200+ seasonal staff with PowerShell, integrating Entra ID group assignment, E5 license provisioning, KnowBe4 training, and secure password distribution.
- Created AD attribute-based workflow to trigger KnowBe4 training deployment, eliminating manual security awareness assignment.

TECHNICAL SKILLS

Security Operations & IR: CrowdStrike Falcon NG-SIEM, CrowdStrike Falcon, Microsoft Defender, Netskope, FortiDLP, Abnormal Security, DLP, alert triage, incident response

Vulnerability & Exposure Mgmt: CrowdStrike Spotlight, Axonius, risk-based prioritization, SLA-driven remediation, CSPM, asset intelligence

Automation & SOAR: Tines, REST APIs, PowerShell, Python, Bash, SQL

Endpoint & Device Management: Microsoft Intune, Jamf Pro, ConnectWise Automate, macOS & Windows hardening, MDM migration, plist & macOS configuration profile customization

Cloud & Identity: Microsoft Azure, Entra ID, Microsoft 365, Microsoft Purview, IAM provisioning

Compliance: GLBA, IRS audit support, automated evidence collection, security awareness training

CERTIFICATIONS

CompTIA CySA+ • CompTIA Security+ • Tines Advanced • Tines Core • Jamf Certified Tech

EDUCATION

Bachelor of Science, Cyber Security — Augusta University, Augusta, GA Dec 2025
